E-mail:

The Achievement in Engineered Timber Award is open to both individual products which advance the technical performance of engineered wood and create new market opportunities, and also to technically demanding or ground-breaking applications of engineered wood products in joinery, manufacturing and construction.

Please give the background to the development of new products, or details of the new application of engineered wood in a building, joinery or other manufactured item.

For products, please provide:

- A description of the development process
- Technical specification and information about the applications of the product
- Information about the performance of the product in the field
- Performance feedback from the market from specifiers or end users

For applications of engineered wood in construction, joinery or manufacturing, please provide:

- Details of the product or products used
- Their role and how they performed
- The benefits they have provided for the building or finished manufactured or joinery item

Please include a minimum of two images to support the submission, and no more than five. And please label picture: “Engineered Timber Award – Company name”.

Please send the completed entry form and supporting documents and images to: [rachel.archer@compelo.com](mailto:rachel.archer@compelo.com) Deadline – **Friday 4<sup>th</sup> August 2017**

The TTJ Awards will be judged by independent panels.
